- Mobile Apps
- Integration
- Vehicle CCTV

WHO, WHY, WHAT?

Providing pre-sales advice, training, customer service, and technical support G-Force Communications Ltd are proud to be a certified sales partner for TomTom Telematics, a relationship which started back in 2009.

TomTom Telematics is one of the world's leading fleet management solution (FMS), or telematics providers with more than 700,000 subscriptions worldwide. The company services drivers in more than 60 countries, giving them the industry's strongest local support network and widest range of sector-specific third party applications and integrations. More than 45,000 customers benefit every day from the high standards of confidentiality, integrity and availability of the ISO 27001:2013 certified service.

Our decision was simple, to choose a trusted global brand providing a highly rewarding tool for any organisation with a fleet, regardless of its size, that is cost effective and 'accurate, reliable, and easy-to-use'.

By identifying the appropriate hardware combination and key features necessary to match your requirements, we maximise the numerous benefits to provide a rapid ROI:

- Improve Efficiency
- Improve Productivity
- Improve Customer Service
- Improve Vehicle Security
- Reduce Fuel Costs
- Reduce Maintenance Costs
- Reduce Administration Costs
- Comply with Legislation

TRACK & TRACE

Basic requirements or a limited budget often result in prospective customers stating that they just want a 'track & trace' solution, not a problem, we cater for everyone. This may be all you ever need, but choose the best available, a system with scope to add extra functionality should your circumstances change in the future.

TomTom Telematics offer a choice of hardwired tracking unit, a plug n' play option, and even a PND (portable navigation device) that tracks your vehicle movements. Choice is everything, allowing for a flexible, bespoke solution designed for you that you can either purchase, lease, or rent.

The Webfleet software is crammed full of features including:

- Live Location (10 sec positions)
- HD Traffic
- Driver Behaviour
- Speed by Road Type
- Geo-Fencing (Areas)
- Address Management
- Scheduled or On-Demand Reports
- Maintenance Facility

CONNECTED NAVIGATION

Now that your vehicle is tracked you know where it is, but more importantly do you know where it's going and what time it will get there?

Designed for professional use our TomTom PRO series units provide best-in-class technology to secure a reliable 'connected' solution between drivers and the office.

Most fleets already use a satnav or PND, many have them factory fitted, those that don't may feel they don't require routing advice as they perform repeat trips to known destinations. That may be the case BUT a 'connected' PRO unit is no ordinary satnav...

- TomTom Traffic & IQ Routes
- Interactive, 3D Maps
- Lifetime Maps with QuickGPSfix
- Advance Lane Guidance
- Active Driver Feedback
- Job Dispatch & Allocation
- 2-Way Comms (text-to-speech)
- Driver ID & Working Time

Choose between a standard 5" touchscreen unit or 7" semi-ruggedised, each available with Truck-specific routes across Europe.

More about the PRO8 series devices:

- Fully customisable with platform control
- USB/BT/WiFi connectivity
- Near-field communication (RFID)
- Micro SD card slot
- Replaceable battery
- Video line-in for Rear Camera support
- 5 megapixel camera and flashlight
- Barcode Scanning
- Digital Signature
- Integrate bespoke business applications

FUEL MONITORING

If you're going to reduce the costs – both financial and environmental – of fuel consumption and CO_2 emissions, you need real-time and historical insight. Spot trends or anomalies with the fuel efficiency dashboard and compare performance over time with fuel and carbon reporting.

Our LINK in-car devices retrieve the information from the vehicle and present it in WebFleet, including RPM, gear usage, and engine trouble codes. Whether you have passenger cars, LCV's or HGV's, we have a reliable solution for you.

TACHOGRAPH SERVICES

From basic digital tachograph support, to remaining driving time, or our remote download digital tachograph manager solution we can help you stay efficient and cost-effective.

WebFleet Tachograph Manager is a complete end-to-end solution that lets you download data remotely and manually, catering for all your fleet. It lets you analyse driver performance data, from driving time to rest periods, and it securely archives all information for easy retrieval.

MOBILE APPS

We currently have two mobile apps that can be found and downloaded free of charge on the App Store or Android Market.

WebFleet Mobile: keep your business on the move while you're on the road, with this app you can view, control and manage your dispersed workforce at anytime, and from anywhere.

WebFleet Logbook: makes it easier for drivers to keep an accurate log of their trips to reduce mileage claim administration and creates reliable logs to help with tax compliance.

INTEGRATION

Whether you want to integrate TomTom fleet management with your office, in-vehicle or mobile applications we've got it covered with our three powerful APIs to help boost your business.

Think software integration, asset management, invoicing, CRM/ERP, fuel cards, route scheduling and optimisation, or vehicle maintenance.

Think hardware integration, barcodes, vehicle cctv, printing, POD, temperature, or tyre pressure.

VEHICLE CCTV

Independent investigation research shows that cars were:

- Assigned fault in over 81% of commercial truck crashes
- The encroaching vehicle in 91% of head-on crashes
- Responsible for 91% of opposite direction side-swipes
- Responsible for 71% of rear end smashes

Protect yourself and your driver and invest in vehicle CCTV. Insurance statistics state that 40% of claims are disputed, yet with vehicle CCTV that reduces to just 2%. Contested claims create extra workload and potential liability, they add stress, frustration and concern for you and your drivers.

Think about the cost implication of excess payments, vehicles off the road, unhappy customers and higher insurance premiums, our solutions provide both peace of mind and a rapid ROI.
