128 GB)

Battery: 4420 mAh
(removable)

Dust/Water: IP6x/IPx5

LTE, Vo-LTE, HD voice call

DIRECT VISION STANDARD

NOW

**PENALTY
CHARGE NOTICE**

£550
per offence

The Direct Vision Standard and HGV safety permit for HGVs is part of the Mayor of London's Vision Zero plan to eliminate all deaths and serious injuries on London's transport network by 2041.

The DVS has been developed in order to address the high number of collisions in London involving HGVs and people walking and cycling.

The DVS objectively measures a driver's direct view through the windows of an HGV cab.

WHO?

Cost of Kit
£550 +VAT
+ Installation

All HGVs more than 12 tonnes GVW entering or operating in Greater London need to hold a valid safety permit.

Built strong from the inside out

Discover a tablet that's strong inside and out. Have complete peace of mind with rugged water and dust resistance, 1.5m drop resistance with inbox cover and a replaceable battery. And with touch sensitivity settings, an Active key and S Pen, you can get to work with gloves on.

Why it's time to upgrade your business phone system

Now more than ever, your business communications are a critical enabler to success.

But things are changing in the world of telecoms and your existing telephony solution might become obsolete soon.

What's happening?

BT Openreach has announced it intends to switch off traditional landlines in 2025. This is commonly referred to as the Public Switch Telephone Network (PSTN) and Integrated Services Digital Network (ISDN) switch off.

The switch off timeline

- 2017** BT Openreach announces intentions to switch off the PSTN in 2025.
- 2019** BT Openreach strengthens the fibre network.
- 2023** Providers stop selling PSTN and ISDN products.
- 2025** PSTN completely phased out.

What's the alternative?

Voice over the Internet (VoIP) services uses your internet connection to transmit voice calls. This is a much better alternative to traditional landlines, and it will be the industry standard for years to come.

- **Unified Communications** are for home, office, remote workers, anytime, anywhere on any device.
- Call, meet, chat, share, work better. Be more connected and productive no matter where you are.
- Digital infrastructure and connectivity are essential for flexible working. Manage your distributed workforce.
- Save up to 80% on monthly PBX fees.
- No expensive hardware needed. Use existing infrastructure.

Hold on, I'm still not convinced. Why is VoIP better than traditional landlines?

VoIP solutions offer a range of advantages over traditional landlines. A VoIP solution is:

Scalable It grows with your business and adjusts to your needs.

Flexible It doesn't tie you to a physical location.

Cost-effective There are no initial and ongoing maintenance costs.

Future-proof It won't become obsolete for a long time.

It's time to start planning your move to the future of business communications - the longer you wait, the more opportunities you're missing out on.

We can help you transition to a VoIP phone system to help your business succeed. Give us a call today to discuss how we can help your business choose the right solution for your needs.
