

FLEET MANAGEMENT AT ITS BEST

WEBFLEET SOLUTIONS

ACHIEVE MORE TOGETHER.

Webfleet Solutions is Business Unit dedicated to fleet management and vehicle telematics. We are one of the world's leading telematics solution providers with hundreds of thousands of subscriptions worldwide.

We service businesses in more than 60 countries, providing our customers the industry's strongest local support network and widest range of sector-specific 3rd party applications and integrations. Tens of thousands of customers benefit every day from the high standards of security, quality and availability of our ISO 27001:2013 certified service, re-audited in June 2015.

WEBFLEET is a Software-as-a-Service (SaaS) solution, used by businesses to improve vehicle performance, help to save fuel, support drivers and help to increase overall fleet efficiency.

Our partner network is unique in the industry. It includes resellers, installation partners and authorised business partners to help you integrate WEBFLEET into your office applications. Together with our partners we ensure that our customers get the most from WEBFLEET.

Webfleet Solutions helps you keep moving towards new business goals. Wherever your drivers are, WEBFLEET keeps your team connected, so we can achieve more together.

FLEET MANAGEMENT

YOU CAN'T MANAGE WHAT YOU CAN'T MEASURE.

That's why, whether you have a fleet of five vehicles – or five thousand – you'll know just how important fleet management is to your business.

FLEET MANAGEMENT IS CHANGING THE WAY WE WORK

Fleet management systems provide you with the information you need to manage your vehicles. They inform you where your vehicles are at any point in time, what they are doing, and how well they are doing it.

This information enables companies to better organise their fleets. And in the process, it enables them to improve customer service, helps them to reduce costs and enables them to show evidence for their compliance. It also enables them to increase driver safety and minimise their impact on the environment.

WEBFLEET is our world-class fleet management solution. It is trusted by over tens of thousands of businesses around the world, helping their fleets and drivers achieve more together.

By connecting your office with your vehicles and drivers on the road, WEBFLEET will enable you to see – in real-time – all your fleet operations such as, vehicle location, mileage driven (automated logbook), fuel usage, driving behaviour, working hours, order status and much more.

This information is displayed on real-time maps, an easy-to-use dashboard and in detailed reports. It is this information that enables you to make the right decisions, based on the right facts, about your business.

WEBFLEET will assist you in managing your business better and is how we can help you achieve more.

WEBFLEET

BRINGING YOUR TEAM CLOSER.

Manage your entire fleet operations from the comfort of your desk. WEBFLEET helps your team work better together – so you can make smarter decisions. Wherever your drivers are, our online fleet management service keeps your team connected.

WEBFLEET is one of the world's leading Software-as-a-Service (SaaS) fleet management solutions. No matter how big – or small – your business, WEBFLEET can help to improve vehicle performance, save fuel, support drivers and, with enhanced visibility of your data, contribute to increased overall fleet efficiency.

The complete fleet management solution includes:

- **MAPS** - Real-time view of vehicle locations and live traffic information
- **DASHBOARD** - Spot trends as they happen
- **REPORTING** - Instant access to historical information
- **MOBILE APPS** - Fleet management on-the-go
- **DATA PRIVACY AND SECURITY** - ISO 27001:20013 certified service fulfills the highest standards of security, quality and availability

We believe that an effective fleet management solution can impact your business positively, and support you in the following areas:

VEHICLE TRACKING

Improve your fleet management with a system that tracks your vehicles in real-time

FLEET OPTIMISATION

Efficiently optimise your fleet using reports, real-time dashboard information and other tools

WORKFORCE MANAGEMENT

Deliver dynamic communication between your office and drivers out on the road

GREEN AND SAFE DRIVING

Empower your drivers to drive safer and more eco-friendly

BUSINESS INTEGRATION

Provide a comprehensive and fully-connected fleet and workforce management solution by integrating WEBFLEET with your back-office applications

ALWAYS KNOW WHERE YOUR VEHICLES ARE.

VEHICLE TRACKING

Improve your fleet management with the vehicle tracking system that lets you locate your vehicles in real-time. With WEBFLEET's easy-to-use interface you can register the time, mileage and location of all your vehicles both in real-time and historically.

REAL-TIME VEHICLE TRACKING

Whether your drivers are parked or on the move, get their location with WEBFLEET. By identifying the best located driver for a new assignment, you can get to your customers faster and minimise time spend on the road.

INFORMATIVE TRACING

Identify where to make savings by tracing previous trips. Trace the journey from start to end, and receive information on the vehicle's speed and number of stops made.

INSTANT, DIRECT ALERTS

WEBFLEET receives alerts instantly when a vehicle enters or leaves a previously designated area or geo-zone. Alerts can be delivered via automatic email notifications or directly to WEBFLEET.

RELIABLE MILEAGE REGISTRATION (LOGBOOK)

Minimise your admin time with automatic registration of private and business mileage. Your drivers can use their smartphone or their PRO driver terminal to add details to their journey, including: type, purpose, contact, and more.

Benefits of vehicle tracking

Provides accountability
For internal management, external authorities and customers.

Gives insights
Use reports to get insights easily and improve quickly.

Is reliable
Know where your vehicles are, at all times.

Is universally applicable
For every company, for every vehicle.

MAKE BETTER FLEET DECISIONS WITH EXTENSIVE REPORTING.

FLEET OPTIMISATION

Enhanced analysis leads to better business results. With reports and real-time dashboard information, WEBFLEET gives you the tools to efficiently optimise your fleet - at all times.

INFORMATIVE, CUSTOMISED KPIS

WEBFLEET's dashboard updates all your customised KPIs in real-time, helping you optimise your fleet wherever you are. KPIs on service, productivity, driving behaviour and fuel indicators can all be configured to your needs, enabling you to spot trends, benchmark your performance and identify areas for improvement.

EXTENSIVE FLEET MANAGEMENT REPORTS

WEBFLEET's rich reporting capabilities include one of the industry's most comprehensive set of ready-made reports, providing detailed insights into the activities of both individuals and the fleet.

The customised reports let you highlight specific information - when you need it. And reports can be scheduled to run automatically or can be downloaded on demand.

Benefits of fleet optimisation

Prove performance

See your fleet performance and KPIs at a glance.

Receive instant notifications

Stay informed, no matter where you are.

Get insights

Capture results and prove your performance.

Make smarter decisions

Make effective decisions based on real-time information to make your business more efficient.

BETTER COMMUNICATION FOR DRIVERS AND THE OFFICE.

WORKFORCE MANAGEMENT

Delivering dynamic communication between your office and drivers out on the road, WEBFLEET keeps your business flexible. So your team and your customers are happy, wherever they are.

JOB AND ORDER WORKFLOW

WEBFLEET sends new job and order details to your workforce's driver terminals, providing real-time status updates and fully automated reports. It makes workforce management easy, and with expected arrival times delivered directly to your office, you can efficiently plan your next job, assigning the correct job to the correct driver.

BEST-IN-CLASS NAVIGATION WITH WEBFLEET TRAFFIC

Webfleet Solutions' best-in-class navigation ensures your drivers have the latest maps and information. WEBFLEET Traffic provides precise, accurate and up-to-date traffic details, enabling your drivers to take the fastest route to the next job, so they can arrive on time.

AUTOMATE WORKING TIME REGISTRATION

Enhance productivity by reducing admin time with WEBFLEET's automated working time registration process.

Benefits of workforce management

Increased productivity
Automated administration processes means more time for priority tasks.

Flexible service
Make your service more flexible and reliable.

Happy customers
Be on time and increase your customer service performance.

Happy team
Relieve stress and save time for the things that matter.

HELP TO IMPROVE DRIVING BEHAVIOUR AND SAVE ON FUEL.

GREEN AND SAFE DRIVING

Empower your drivers to drive more safely and in a more environmentally-friendly way with WEBFLEET.

MONITOR FUEL USAGE AND CARBON EMISSIONS

Real-time and historical insight into your fleet's fuel consumption and emissions allows you to spot trends or anomalies, and with fuel and carbon reporting you can compare performance.

KNOW YOUR VEHICLES ARE WELL MAINTAINED

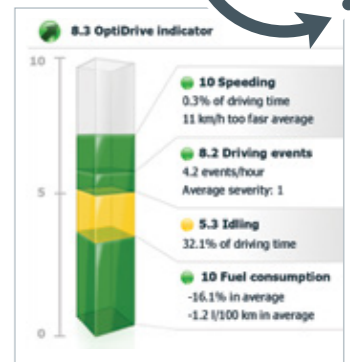

With WEBFLEET you'll be notified if a vehicle has diagnostic troubles and you can plan maintenance tasks based on real-time mileage information.

HELP TO OPTIMISE FLEET PERFORMANCE

We know that responsible driving helps reduce the total costs of vehicle ownership, so continuously improving your fleet's performance is vital.

From there, we developed **OptiDrive 360**, our award winning solution, helping drivers adopt a responsible driving style, with tailored insights delivered straight to the fleet manager's and driver's dashboards. What's more, it delivers real-time feedback and driving advice before, during, and after the trip.

OptiDrive 360 allows you to actively manage driver behaviour with tailored insights on eight driving performance indicators: Speeding, Constant speed, Driving events, Coasting*, Idling, Green speed, Fuel and Gear shifting.

Benefits of green and safe driving

Cut costs

Eco driving is one of the smartest ways to reduce fuel cost.

Safer driving

Helps to improve driving behaviour and keep vehicles well maintained.

Less carbon

You are enabled to reduce your carbon emissions with eco driving.

Green credentials

Contribute to your commitment of being environmentally responsible.

* Coasting means keeping the car moving, without accelerating, whilst the car remains in gear. You should not travel whilst the car is out of gear or with the clutch depressed. This is dangerous as it reduces driver control.

INTEGRATE WITH YOUR EXISTING BACK OFFICE SYSTEMS.

BUSINESS INTEGRATION

WEBFLEET integrates seamlessly with your current software and mobile applications, giving you a comprehensive and fully-connected fleet and workforce management solution.

Allowing you to access all data through your existing systems, from mobile workforce and vehicle information to mobile data. WEBFLEET integrates with the application software you are currently using such as, ERP, CRM, routing, planning, dispatching and more. With the help of Webfleet Solutions and our wide network of trusted software and hardware alliance partners, you can:

- Access dozens of existing partner applications
- Implement your solution quickly and easily
- Benefit from Webfleet Solutions' world-class API - WEBFLEET.connect

APP CENTER

The industry's largest selection of integrated apps. Thousands of companies have already integrated third party applications with WEBFLEET's fleet management data, so whether you want to integrate WEBFLEET data with your office, in-vehicle or mobile applications - or vice versa - we have it covered.

WEBFLEET APIS

Our three powerful APIs help boost your business:

WEBFLEET.connect - Integrate WEBFLEET with your office applications.

LINK.connect - Connect with third party Bluetooth devices and transmit data from the field to your back office.

PRO.connect - Customise every step of workflow, with mobile apps on the PRO 8 series driver terminal.

Business integration benefits

Boost applications
Benefit from a fully-connected fleet and workforce management solution.

Fast integration
Implement your solution quickly and easily.

App Center
Access one of the industry's richest suite of integrated applications.

Work smarter
Customise your workflow, both on the road and in the office.

SOLUTIONS FOR LONG HAULAGE AND PASSENGER TRANSPORT.

HEAVY GOODS VEHICLES

We empower businesses to maximise the efficiency of their trucks and drivers with dynamic dispatching, and give them the tools to stay compliant with driving and working time regulations.

DYNAMIC SCHEDULING FOR HAULAGE COMPANIES

Optimise your dispatching process with remaining drive time information. WEBFLEET's up-to-date information allows you to dynamically improve your planning for optimum scheduling.

COMPLIANCE WITH WORKING AND DRIVING TIMES

WEBFLEET Tachograph Manager makes it easy for your truckers on the road and team in the office to remotely download, analyse and archive trip data - directly from your truck's digital tachograph.

ADDITIONAL VEHICLE INSIGHTS

WEBFLEET lets you connect to your truck's FMS to detect fuel level anomalies, as well as check your drivers' RPM and PTOs.

THE BEST TOOLS FOR YOUR TRUCKERS

Make life on the road easier for your drivers with truck-specific routing, world-class WEBFLEET Traffic information and an unbeatable WEBFLEET connection. PRO 8275 TRUCK combines the latest navigation and fleet management technology to keep your business moving.

Empower your drivers with:

- Ruggedised and fully-customisable driver terminal with 7" screen
- Truck-specific navigation and WEBFLEET Traffic
- Digital workflow customised to suit your procedures
- Rear-view camera
- NFC/RFID technology on board
- Barcode scanning, digital signature capture and driver ID

Benefits of truck navigation

Width

Height

Weight

HAZMAT

A truck specific routing algorithm that favors main roads over small ones, avoids small streets, sharp turns and U-turns as much as possible. Also includes custom access restriction settings for dimension, weight and hazardous materials.

PRODUCT OVERVIEW

ALL YOU NEED TO STAY CONNECTED WITH YOUR VEHICLES AND DRIVERS.

Our products are designed to help your teams work better together. We connect your vehicles and mobile workforce to the office so you can make smarter decisions. How do we do that? Simple, we make connecting easy. Easy for drivers, easy for dispatchers and easy for management.

LINK VEHICLE TRACKING DEVICES

The LINK vehicle tracking devices give you far more than just positioning data. Your vehicles stay connected to your business with additional insights on driving behaviour, engine diagnostics and more information in and around the vehicle.

LINK 201

Entry level vehicle tracking device with easy self-installation via the OBD II port.

LINK 410

Reliable passenger car and light commercial vehicle tracking.

LINK 510

For advanced integration into the vehicle using the FMS connection, add-on options include: external GPS antennas, digital tachograph and more.

VEHICLE TELEMATICS DEVICES

The easiest way to drive more efficiently.

LINK 105

The vehicle telematics device that delivers real-time data such as fuel consumption, CO₂ emissions and engine diagnostics.

PRO driver terminals

Our PRO driver terminals feature job workflow management, working hour registration and much more. With PRO driver terminals your drivers can benefit from our world-class navigation and traffic information technologies, helping to ensure that they arrive at their destinations quicker and safer. And with WEBFLEET they can easily record working hours, manage their job assignments and – most importantly – help them drive more efficiently.
