Route planning & ePOD

01373 466 626

We help you eradicate paper, cut costs & improve efficiency

We provide route planning and electronic proof of delivery software to companies looking to cut costs, slash empty running and improve customer experience.

Now in our 25th year Podfather is G-Force's partner of choice for route optimisation, delivery execution and ePOD.

Our easy to use driver app runs on both iOS and Android devices and integrates with Webfleet for a seamless solution that delivers big benefits and a fast ROI.

Compatible with mobile devices from **webfleet**

Standard functionality

- Order management
- Vehicle tracking
- Route optimisation
- Proof of delivery
- Vehicle checks
- Driver app

CONTENTS

Introducing the Fleet Solutions Department

A very experienced and talented team consisting of office and field-based account managers, targeted to drive new sales and existing account development. This includes regular proactive reviews, upgrade advice, industry and product news, plus reactive customer service and training support.

Backed by sales support staff ensuring contracts and nationwide engineering requests are processed swiftly and effectively, customer satisfaction is the priority of our daily operations.

The team now manage over **300** fleet accounts and more than **6500** units.

Fleet Management

webfleet
PREMIUM PARTNER

A term that describes the practices and technologies used by companies to manage their commercial vehicle fleets. The goal of fleet management is to increase operational efficiency, reduce costs and improve overall fleet performance.

Discover Webfleet, Europe's number one fleet management solution, providing real-time insights that help companies optimise their fleet operations.

Vehicle CCTV

FACT Every 16 minutes* someone is killed or seriously injured on UK roads.
*figure reflects a 10-year average from 2013-2022

With the estimated total cost to the UK economy for all road crashes topping £30 billion, and 'Crash for Cash' insurance fraud estimated at £300 million, the requirement for vehicle CCTV has never been greater.

Incident footage helps dispute liability and challenge fraudulent claims. Adopting vehicle CCTV is an effective deterrent against poor driver behaviour, promoting safer driving and reducing potential accidents.

Explore our full range of solutions, from dashcams to multi-lens combinations, with optional remote viewing access providing 'first notification of loss evidence'.

Further enhance with AI (artificial intelligence), to monitor driver distraction and deliver 'first notification of risk' footage.

Comply with safety legislation by installing our hardware bundles for FORS or TfL's Direct Vision Standard & Progressive Safe System.

Stolen Vehicle Tracking

vodafone automotive

We offer Vodafone Automotive UK's range of world-leading tracking devices to protect you and your vehicle. They provide geolocation, tracking find recovery services for stolen vehicles in the UK and worldwide, via an integrated network of remote monitoring platforms and in partnership with local police.

Why Webfleet?

G-Force Communications are a Webfleet Premium Partner, a relationship established in 2009.

Webfleet is one of the world's leading telematics solution providers, dedicated to fleet management, vehicle telematics and connected car services. Its main Software-as-a-Service solution Webfleet is used by businesses of all sizes to improve vehicle performance, save fuel, support drivers, and increase overall fleet efficiency. In addition, Webfleet provides services for the insurance, rental and leasing industries, car importers and companies that address the needs of businesses as well as consumers.

Webfleet was formerly known as TomTom Telematics and was part of the TomTom group until 1st of April 2019 when it was acquired by Bridgestone Europe NV/SA ("Bridgestone"), a subsidiary of Bridgestone Corporation, a leader in advanced solutions and sustainable mobility. Bridgestone operates in 38 countries across the EMEA region, with some of Europe's most advanced factories, world-beating technology and leading R&D investments.

Fuel Monitoring - Lower your fuel spends with insights on vehicle-specific and fleet-wide fuel consumption patterns by using Webfleet. Assess real-time and historical data to identify actions your fleet can take to adopt more fuel efficient driving, maintenance and route planning. Monitor how your fuel savings lead to reduced CO_2 emissions.

Support your drivers with in-vehicle feedback and advice through our PRO Driver Terminals. Audio-visual messages help drivers adjust fuel-wasting, CO_2-emitting habits in the moment, from idling and speeding to improper gear shifting.

Tachoshare Plus – a Remote Download module that offers connectivity to 3rd party analysis software, it automatically downloads driver card data daily and vehicle unit data every 7 days to Webfleet secure servers where it is archived for a minimum of 2 years. Helps you to stay compliant with driving time regulations without contacting the driver, get timely social infringement notifications to reduce the impact of fines.
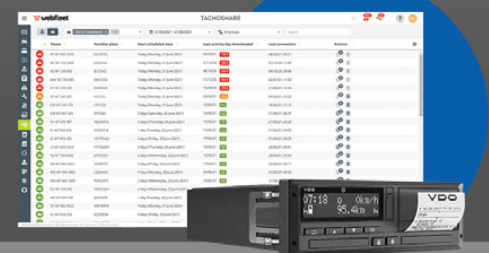

EV - Webfleet lets you monitor electric, hybrid and ICE vehicles on the same dashboard and compare them in meaningful ways. Conquer your range anxiety by tracking the battery levels and ranges of all your electric and plug-in hybrid vehicles, displaying current power levels and driving range remaining.

Webfleet displays charging stations clearly on the map, including how many bays or connectors are available in real time, making it easier than ever to be sure the EVs you dispatch have plenty of battery charge to make a journey and return.
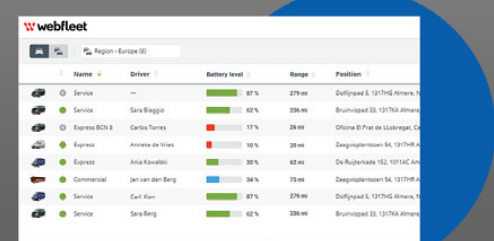

The Webfleet Rugged Range

All HGVs more than 12 tonnes GVW entering or operating in Greater London need a three-star rating, from 28th October 2024

WHAT?

The Direct Vision Standard (DVS) and HGV safety permit scheme for heavy goods vehicles requires operators of lorries over 12 tonnes gross vehicle weight to obtain a safety permit before entering and operating in most of Greater London. Otherwise, you may receive a Penalty Charge Notice.

WHY?

The Direct Vision Standard and HGV Safety Permit Scheme are part of the Mayor of London's Vision Zero plan to eliminate all deaths and serious injuries on London's transport network by 2041.

WHEN?

PSS Enforcement 28.10.2024

WE PROVIDE

1080p AI Pedestrian Detection Cameras	Quad Screen FHD Monitor	Audible Left Turn & Internal Audible 'Pedestrian Detection' Alarms	4-Minute Timer Delay + Speed & Indicator Module	Blind Spot Sticker
1	**2**	**3**	**4**	**5**

WHAT'S NEW?

With the addition of a Moving Off Information System (MOIS), the PSS also uses a Blind Spot Information System (BSIS), and a Camera Monitoring System (CMS) to completely eliminate the blind spot on the nearside of the vehicle.

WE RECOMMEND

using this kit in conjunction with our Multi-Camera DVR solutions.

My Connected Car App

With My Connected Car, you can access and manage, a number of your vehicle security and safety functions remotely.

Introducing the Comms Solutions Department

A dedicated and very knowledgeable team of product specialists, account managers, and sales support staff, with a focus on providing unified communications solutions to new and existing customers. We follow a consultative approach to understand your unique requirements, design tailored solutions, deliver and install the latest technology and equipment, provide ongoing maintenance and support, and regularly review your account to ensure we track your evolving needs.

Our commitment to excellence ensures that you receive exceptional service throughout your partnership with G-Force Communications.

The team now manage over **450** comms accounts and more than **8000** connections.

Mobile Solutions

Like fingerprints, no two businesses are the same. They may be similar in size, structure, and industry but they are not the same. This can be said for your mobile voice and data usage, therefore an off-the-shelf tariff solution will rarely be the best fit, although it can often be a good starting point in the bespoke tariff design service that we provide.

We request the opportunity to analyse a range of your existing bills so that we are working with the facts and considering usage peaks and troughs perhaps influenced by sales activity or seasonal trends, and we also consider your future plans and company direction. Utilising our years of experience we combine that with any one or several options from our tariff toolbox to match or exceed your requirements, maximise savings and provide excellent value for money.

If your mobile estate grows and there is a specific need for multiple networks we can provide you with one account and support you with one point of contact for all your service requests.

Telephony Solutions

In 2025, Openreach will switch off the Public Switched Telephone Network (PSTN), which means every business currently using PSTN-based services will need to move to another service before then. That migration is now more than half complete and Openreach has already stopped selling many well-known telecoms services at hundreds of exchanges across the country.

Although it may still feel as though 2025 is a long way off, the reality is that choosing to switch now could save your business money and avoid potential backlogs or delays further down the line when the rest of the UK decides now's the time to change. We're supporting our customers to consolidate a comms infrastructure designed to empower a flexible and mobile taskforce and to consider future business projects.

Networks & Tariffs

O2 - Award Winning Network

There's a reason why 75% of O2 business customers stay with them for more than five years. Whether you're working from home, the office or on the go, O2 will help you stay connected to your customers and employees, and keep your business running.

Data Rollover   O2 Priority   Flexible Plans

Vodafone - Built for Business

Keeping pace with digital development can be challenging – that's why Vodafone is here to help your business succeed. They're constantly investing in new technologies to provide a platform for businesses of all sizes to innovate, achieve and stay connected.

Future of 5G   Most Reliable Network   GigaCube

EE - Unbeatable 5G

It is fair to say EE understand the importance of providing a service that's as adaptable as it is reliable. And that's why EE has been crowned the UK's best network for the ninth year running by RootMetrics, the independent mobile analytics firm.

Unbeatable 5G   Fastest UK Network   Stay Connected

Three - Connecting your Business World

Voted the UK's Best Network for Business by the Mobile Industry Awards 2023, we deliver products and services to help businesses thrive. With flexible business plans, all with unlimited calls, texts and data as standard, we're here to make business better for everyone.

THE BIG SWITCH OFF.

DEADLINE

LEARN MORE

In 2025 the last elements of Openreach's analogue and digital ISDN copper network will be turned off as an all-IP network replaces these legacy services. The impact on telephony and broadband services is far reaching so you need to know how it will impact you.

The project was first announced in November 2017 and has been spreading slowly across the country ever since.

4 Reasons

TO CONTACT US & SWITCH BEFORE THE 2025 'SWITCH OFF'

Lower Costs	Higher Scalability	Multi-Tasking	Accessibility
Calls are cheaper on VoIP compared to traditional phone lines	One of the biggest advantages of VoIP is scalability. Ideal for businesses eyeing expansion.	Hold conference calls and send videos, photos and documents in the middle of the conversation	Make calls from anywhere using any device. If you're unavailable you can direct your incoming calls to someone else.
