Webfleet TachoShare

Remote download and archiving module that puts you in charge of tachograph data

Webfleet TachoShare is a Remote Download Module that downloads tachograph data from vehicles on the road and offers connectivity to 3rd party analysis software. You get complete control of how you use your data and who you share it with, from a secure, accessible archive.

BENEFITS

COMPLIANCE MADE SIMPLE

- Minimise administrative hassle and time spent with automated remote downloading
- Easily see which vehicles and drivers are up to date with downloads to avoid fines
- **With TachoShare Plus:** Helps you to stay compliant with driving time regulations without contacting the driver, get timely social infringement notifications to reduce the impact of fines

SAVE COSTS, BOOST PRODUCTIVITY

- Your vehicle schedule suffers less interruptions keeping your drivers on the road
- Save staffing resources by cutting out administrative duties
- **With TachoShare Plus:** Get access to real-time remaining driving time information for increased utilisation

ENHANCE DATA SECURITY

- We manage your Company Card for you, keeping it in a secure data centre
- No local infrastructure is required to host data, as it's all managed by Webfleet Solutions
- Data is stored in compliance with GDPR
- Clear user control and access right settings

INTEGRATION WITH LITTLE DISRUPTION

- You don't need to switch from your existing tachograph analysis service provider
- Data is sent straight to 3rd party analysis applications*, to improve your process

FEATURES

AUTOMATED REMOTE DOWNLOADING AND ARCHIVING
Automatically downloads driver card and vehicle unit data to Webfleet Solutions' secure servers where it is archived for a minimum of 2 years**, to make compliance easier.

DATA SHARING WITH 3RD PARTY TACHOGRAPH ANALYSIS PROVIDERS
Share it as you see fit with your existing 3rd party analysis provider*.

OVERVIEW OF DOWNLOAD STATUS VERSUS SCHEDULE
Stay informed and up-to-date with your legal requirements at all times, with a clear view.

MANUAL REQUEST FOR VEHICLE UNIT DATA
Provides freedom if the user wants to request data outside the already specified schedule.

TACHOSHARE WINDOWS APP
A handy tool that helps automatically download your tachograph data stored in the Webfleet archive to your local Windows desktop computer.

TACHOSHARE PLUS

With an additional subscription you can benefit from all the above features plus:

INCREASED AUTOMATED DOWNLOAD SCHEDULE
- Vehicle unit data scheduled every 7 days
- Driver Card data scheduled every day

HIGH FREQUENCY DATA
- Enables additional features in 3rd party platform
- Required for some compliance schemes
- Simplifies operation where data is used for salary calculations

REMAINING DRIVING TIMES
- Accurate daily and weekly remaining driving time for ad hoc dispatch and scheduling
- Real-time social infringement notifications.

** API available for 3rd party providers to integrate their service.*
*** Longer periods of archived data are available where local legislation requires.*
