Downloading and Adding Webfleet Maps to an SD Card

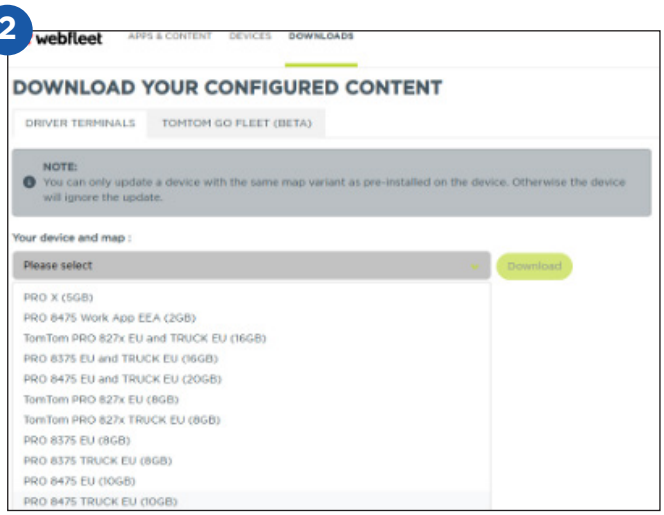
Requirements

Micro SD Card - Minimum 32GB

SD Card Reader, or a computer with an SD card slot

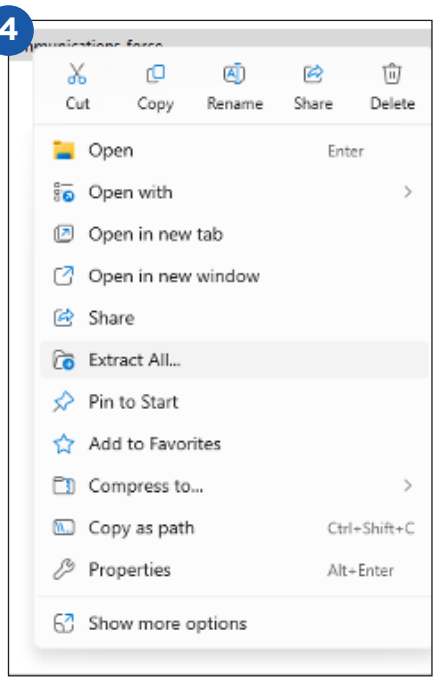
1. **Access the Webfleet MDM Portal**
   Go to https://mdm.webfleet.com/static/#/

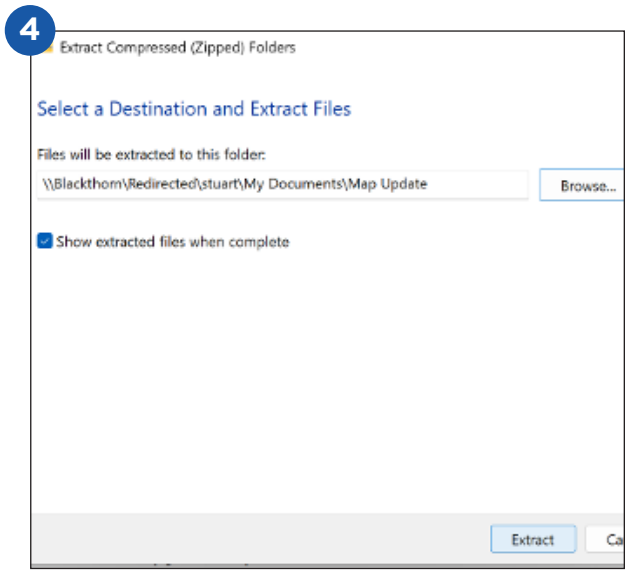
2. **Select Your Download**
   Go to the Downloads tab
   From the drop-down menu:
   - Select the device type
   - Pick the applicable map download



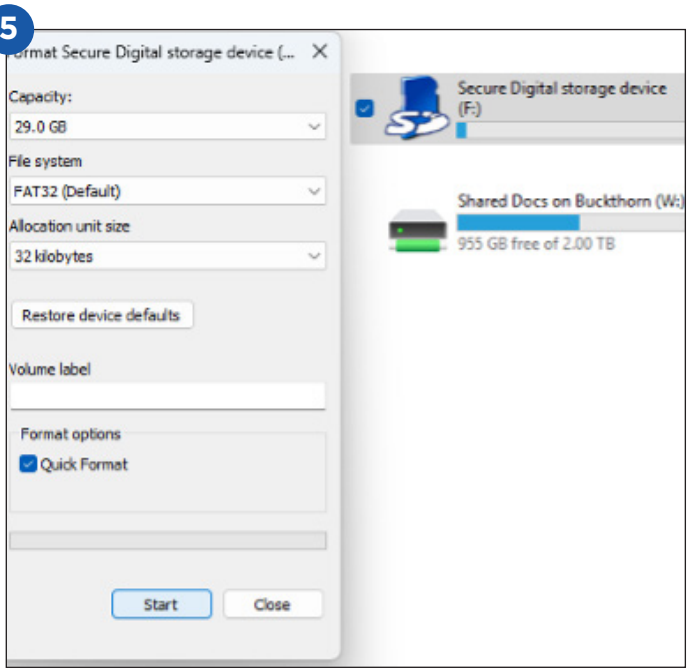
3. **Download the Map File**
   Click Download to save the .zip file to your computer.

4. **Extract the Downloaded File**
   - Locate the downloaded .zip file.
   - Right-click and choose Extract All, or use your preferred extraction tool.
   - **Important:** You need to copy the extracted folder, **not** the ZIP file.

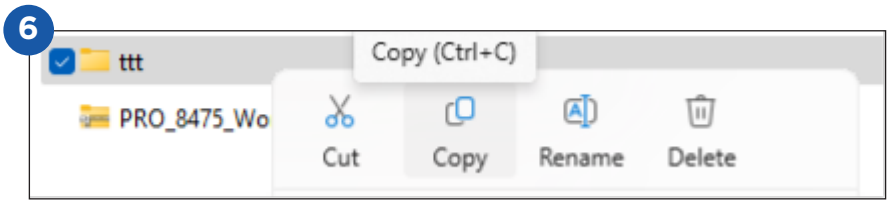




5. **Prepare the SD Card**
   - Insert the SD card into your computer.
   - Open **This PC / My Computer.**
   - Right-click on the SD card and select **Format**.
   - Choose **FAT32** as the file system.
   - Tick **Quick Format**, then click **Start**.
   - Once complete, your SD card will be ready to use.



6. **Copy the Map Files to the SD Card**
   - Open the extracted folder on your computer.
   - Copy **all files inside** (not the folder itself).
   - Paste them directly onto the **blank SD card**.



Tip: Safely eject the SD card after copying is complete to avoid data corruption.
