

## Setting up the Webfleet Pro X

1. Enter SIM card
2. Power on device, change language to English (United Kingdom), press start
3. Connect to Wi-Fi
4. Press Don't copy Apps & Data
5. Sign into Google account
6. Press Accept
7. Press 'Don't back up' (if you are using the same Gmail account on multiple devices)
8. Set up a PIN if you want, skip if not
9. Skip setting up Google Assistant
10. Anything else? – No thanks
11. Once powered on, there will be a software update symbol in the top left, download this.
12. Press Install once downloaded

### Logging into Webfleet Work App to download maps

Decide if you would prefer Fixed, or Flexible pairing:

#### **Fixed** – If the device stays with the same vehicle (no sign in required)

1. Log into Webfleet
2. Select the vehicle
3. Press details in the bottom right
4. Press the configuration tab at the top
5. Press edit in the bottom right
6. Scroll a little to find the Pairing mode section, select Fixed Pairing, press Continue
7. This will create a QR code, leave this on your screen
8. Go to the work app, select Sign-in options (small text below Phone Number)
9. Press Enter pairing code, and scan the QR code on your computer

#### **Flexible** – If the devices move between vehicles (driver signs in every morning)

1. Open the Webfleet Work App
2. Log in using either Email, or phone number (these details must be in the driver's profile in the Webfleet portal)
3. Press Continue, and select your vehicle from the vehicle list

### Downloading Maps

1. In the Work app, press the navigation arrow on the left, this will open TomTom Go Fleet
2. Your Information – Press yes when asked if the app can send you information
3. It will ask about downloading a map, select More Maps
4. Scroll and press Europe Regions
5. Scroll down to United Kingdom, select all UK
6. Select Yes when asked about ferry crossings
